Summary

Software Engineer at **VakıfBank** developing bancassurance applications with **.NET**, **Angular** and **Oracle**. Previously built real-time systems, AI-powered applications and SaaS products through internships and personal projects. Focused on writing **clean**, readable and efficient code that follows **SOLID** principles and fits existing infrastructure and team standards.

Experience

VakıfBank – Bancassurance Technical Department | *Associate Software Specialist* Feb 2026 – Present

- Develop and deliver business-unit requests and new projects for bancassurance applications used across **branch**, **call center** and **mobile** channels with **.NET**, **Angular** and **Oracle**.
- Worked on integrating a **new insurance company** into the bank's systems, including related units such as legal follow-up.
- Identify time-consuming team processes and build **internal automation**: fully automated on-call rotation tracking and enabled rapid generation of **test data** (quotes and policies).
- Actively migrate branch screens from **WPF** to web-based **Angular**, and work on moving **mobile** insurance screens to a new infrastructure and developing new products.
- Add new features to existing products on request (e.g. **EUR** support for a premium-refund insurance product) and debug **production** issues to deliver fixes.

BosphorusISS | *Software Development Intern* Jul 2025 – Aug 2025

- Built a real-time task management system with **.NET Core**, **EF Core**, **PostgreSQL** and **SignalR** following **Clean Architecture**.
- Added **Redis** caching to reduce database load and integrated **RabbitMQ** and **Quartz** for asynchronous messaging and scheduled jobs; containerized services with **Docker**.

Sovos | *R&D Product Development Intern* Dec 2024 – Apr 2025

- Developed an AI-powered tax compliance chatbot prototype using a **RAG** architecture, ready for integration into Sovos products.
- Built the backend with **ASP.NET Core** (N-Tier) and the frontend with **Angular**; created a domain-specific dataset by web scraping Turkish Revenue Administration (GİB) data.

TCM Bilişim | *Software Developer Intern* Jul 2024 – Dec 2024

- Developed custom enterprise applications for corporate clients with **C#**, **ASP.NET MVC**, RESTful APIs and console-based services on **Microsoft SQL Server**.
- Automated business workflows with **Power Platform** and **SharePoint**.

TÜBİTAK | *Undergraduate Researcher (2247-C STAR Program)* Feb 2024 – Dec 2024

- Developed ML models (ANN, kNN, Gradient Boosting, Random Forest) in **Python** for **6G** numerology allocation.

Projects

Randevubulurum.com – randevubulurum.com | *.NET 8, PostgreSQL, Docker, Nginx*

- Built and operate a production SaaS appointment platform with **CQRS** and **Onion Architecture** on Linux, Docker and Nginx.

Multimodal Meme Classification (Graduation Project) | *.NET 8, Angular, Python, FastAPI, PyTorch*

- Integrated the **.NET** backend, **Angular** frontend and **FastAPI** AI service into a full-stack classification platform processing **5,000+** text and image entries (**89%** accuracy).

Education

Eskisehir Osmangazi University | *B.Sc. in Computer Engineering (GPA: 3.09/4.00)* 2020 – 2025

42 Istanbul | *Peer-to-Peer Software Engineering Program (C/C++, Unix, Algorithms)* 2025 – Jun 2026
